

## About Us :

We feel immense pleasure to introduce ourselves as the leading manufacturers of wire straightening and cutting machines we have more than 200 machines running successfully in India and abroad. Since last one decade we have successfully installed the said machines at works of no. of clients belonging to various industries in India and overseas. The machines are manufactured under very strict quality control policy adapted by the company and hence receiving the repeat orders has now become a tradition at **VEER MACHINERY**. We have developed a wire straightening and cutting machine taking in consideration the working conditions in the industry to ensure maintenance free operation throughout its lifetime for continues production. It is truly maintenance free so that to provide a leading edge in this drastic growth of the wire industry. The technological soundness of the machines not only ensures the long life of the machines but also promises for the minimum operating cost with lowest maintenance. After-sales support, including the sale of all replaceable parts of the machines is the another area where **VEER MACHINERY** is undoubtedly ahead of others. Feel free to seek any further information about the company or the products or if you have any query regarding straightening.

Thanking you and anticipating long term business relations with you.

## SUPER-500

It has a three dimensional straightening mechanism based on the principle of fatigue stress with the help of spindle. It has a new technology of universal box conveyor or ready to operate box conveyor with no setting required. The machine is specially designed for maintenance free operation and smooth working. The following data will provide you a better idea of the machine.

### Technical detail :

**Wire :** 1 - 5 mm  
**Speed :** 30m-60m / min  
**Power consumption :** 7 H.P.  
**Weight :** 800 KG  
**Applicability :** Plain Wire

### Salient features :

- Maintenance free design
- **Closed universal box conveyor**
- Individual motor for each motion thus easily controllable
- After sales service
- Anti vibration mountings to isolate spindle vibrations
- Close fit tolerances
- Chain drive for pulling roller
- Automatic wire oiling system (optional)
- Spindle rpm upto 5000 rpm for better straightening
- Welded body for sturdy construction
- Coil tightening mechanism and brake system in de-coiler for unmatched performance
- Aesthetic look to suite your premises
